Dear Sir/Madam

Bursary Application Letter For Information Technology

My name is Siboniso Khumalo. I am writing to apply for the bursary program to secure funding for my studies in 2018.

Ever since my secondary grades I always have been the dedicated pupil, hardworking and focused. I believe it is with these traits that I became distinguished from my peers. I have, however been unsuccessful in the past year to secure any funding for my studies from the national loan scheme to further enroll myself for a National Diploma in Information Technology(Support Service).

I would like to further my studies, to strengthen my employability chances when I complete. I currently stay with my family, my mother and siblings. The situation is dire as we are dependent on child support grant since my mother is not working and my father passed away. I set my eyes in achieving more than I am destined for, in order to change the situation at home and provide a better life for my family, especially my younger siblings.

South Africa is still a developing country and offers many opportunities for growth and contribution from its graduates. I believe I will contribute positively to the science advancements in our country with the knowledge I will acquire. I would be honored to further my studies and contribute to the greater good of developing our country with skills and expertise.

Thank you for taking the time to read my application. I hope it receives your favourable consideration. I am eagerly anticipating your positive response.

Yours Sincerely

Siboniso Khumalo
